HENRY SCHEIN®

ePrescribe

Introducing Electronic Prescriptions from the New York State Dental Association and Henry Schein

Effective March 27, 2015, practitioners in New York State are required to electronically prescribe all medication. Beat the rush and sign up today.

New York State law requires all providers to use electronic means to transmit prescriptions beginning March 27, 2015. New York State Dental Association (NYSDA) has partnered with Henry Schein to offer you, as a member of NYSDA, an electronic prescribing solution at a discounted price to ensure that you can meet this requirement.

New York State Dental Association

Convenient for Patients, Convenient for You

Electronic prescribing automates the process of writing and transmitting prescriptions to pharmacies while preventing potentially dangerous drug-to-drug interactions, drug allergies, dosage errors and other problems that can occur when writing prescriptions on paper. It is accessible instantly from anywhere and requires no downloads or new hardware. Electronic prescribing provides a HIPAA-compliant, web-based means for dentists to send prescriptions electronically to retail and mail order pharmacies. Simply put, you and your staff can streamline operations to provide better care, and save time doing it.

Electronic Prescription of Controlled Substances

Electronic prescribing gives your office the ability to electronically prescribe controlled substances (EPCS) including Schedule II hydrocodone prescriptions such as Vicodin® and Lortab® in accordance with new Drug Enforcement Agency (DEA) requirements. With the reclassification of hydrocodone from Schedule III to Schedule II, using ePrescribe from a certified vendor means that your practice can continue to prescribe medication common to dental procedures without completing complex forms.

HENRY SCHEIN®

Advanced Integration for Henry Schein Software Customers

Henry Schein software customers who use Dentrix, Dentrix Enterprise, OMSVision, PerioVision, EndoVision and DentalVision Enterprise can now send electronic prescriptions with an integrated solution from inside their software saving time and effort. Patient information fields are prepopulated to reduce the amount of staff data entry. For Henry Schein customers using Easy Dental, Viive and Dentrix Ascend, a separate stand-alone solution is now available. Easy Dental and Viive customers can expect an integrated solution with ePrescribe by early 2015.

All of the Henry Schein ePrescribe solutions are powered by Allscripts, the leading global provider of electronic prescription technology with the largest network of pharmacies.

Stand-Alone Solution for Non-Henry Schein Customers

As mentioned above, we are also offering a standalone ePrescribe solution for dentists not currently using a practice management software system, using Easy Dental, Dentrix Ascend or Viive or have a non-Henry Schein system. This solution allows you to upload your patient data to simplify patient indentification and download of all prescription written into an Excel spreadsheet for office recordkeeping. In addition, NYSDA has negotiated a discounted pricing for dentists who are looking for a new software solution and are considering a Henry Schein product.

DEA-EPCS Certification

All of the electronic prescribing solutions offered through our partnership with Henry Schein, through its relationship with Allscripts, meet the DEA-EPCS Certification requirements and may be used for creating and electronically transmitting Schedule II, III, IV and V controlled substance prescriptions.

Sign Up Today

Whether you use a Schein software product, another company's software product, or no software product at all, we have a solution for you. And all these programs have been discounted for NYSDA members.

To sign up today, call **888.988.4804** or www.HSePrescribe.com/purchase.
